Announcing a new collaboration tool to meet virtually with your students. Zoom is now available to all UTSA faculty, staff and students as part of the newly acquired university site license.

The UTSA Zoom license will provision your UTSA email account with a Higher ED Pro Zoom account which includes:

- Up to 300 participants per meeting session with unlimited time
- Enhance collaboration with Polling, Breakout Group rooms, and Q&A
- Session recording and automatic transcription of meeting option for students to learn at their own pace
- Zoom enabled FERPA compliance and provides 256-bit AES encryption
- Single sign-on integration - UTSA ID username & password

Coming Soon:

- LTI integration with Blackboard
- Cloud recording with Panopto

To activate your UTSA Zoom account please follow these steps below.

1. Visit https://utsa.zoom.us/
2. Click on “Sign in to your account”
3. You will then be directed to the UTSA single sign-on (SSO) page to provision your account with your UTSA ID username & password. Once it authenticates, you will be given access to your account by either using the Web browser app or by downloading & opening the Zoom desktop application.

Your UTSA Zoom account is now ready. You can now access it any time by logging in here for the https://utsa.zoom.us/ web browser app or by downloading the Zoom desktop app. You will need to select login with SSO for the desktop app.

Note: If you currently have a basic or paid Zoom account that uses your UTSA email for the sign-in, you will then receive an email notification to consolidate that account into the UTSA master domain site. You will need to click and confirm that you would like to become a licensed Higher ED Pro Zoom account member under the UTSA organization. You also have the option to change the email account being used on that Zoom account if you do not wish to consolidate. You will still have access to a UTSA Zoom account.

Highly recommended to visit UTSA Zoom Resources for getting started and best practices: https://provost.utsa.edu/academicinnovation/learning-technologies/zoom.html
